Hi Chance,

Thanks for drafting this. I made two very minor changes, other than that, I think it looks good. I think it's best not to add much more detail into the agenda, unless there are specifics you want to include.

Also, I recall that you said your attorneys were putting together some documents regarding what is considered a WQS. I forgot to ask on the phone earlier today, but is that still going to be a topic at the meeting?

Thanks for the link to the guidance document, I'll take a look.

Matt,

Attached is a rudimentary agenda – needs more detail but let me know what you would like to change. Also, here is the link to our draft sediment cleanup guidance to help answer your questions on how the site specific risk assessment process can work: <https://fortress.wa.gov/ecy/publications/SummaryPages/1209057.html> Please refer to Chapter 9 for detail on the human health piece.
